Student Voices: Imagining AI-enabled Education

AI, a computer system is being used in a variety of ways in education, from teaching a computer to interpret images to teaching a machine how to read and write. AI can be used to automate tasks in the classroom, such as grading and checking student work. It can help teachers better plan lessons and customize learning materials to meet the needs of each student.

The future of AI in education is upon us. AI can help us to learn in a more efficient and effective way, and it can even help us to learn new things faster.

However, there are many challenges with using artificial intelligence in education. The first challenge is that AI is not always accurate. Another challenge is that AI can be used to deceive or manipulate students. As AI becomes more sophisticated, it will be able to assess the quality of education in a much more accurate way. This will allow us to make better decisions.

व्यवहार

व्यवहार एक ऐसा गहना है ।
व्यक्ति का चरित्र ही सुन्दर मैना है ॥
सांस्कृतिक परिचय और परिभाषा,
बोलचाल प्रसार की मौखिक अभिलाषा ॥
समाज एक चक्रव्यू है, जो चारो दिशाओं से उलझा हुआ है,,
फिर भी अनुशासन और तृष्टि करण की नीति से सुलझा हुआ है ॥
पहनावा, बहकावा, यह अकारण ही आर्थिक गोलबंदी है,,
समाज की दृष्टि से समझदारी प्रस्तुत करना ही असलियत की टोलबन्दी है ॥
यह देश विदेश की उड़ाने भरना,,
जो सुन्दर जीवन जीने का प्रयास करना,,
प्रत्येक व्यक्ति का सपना है,,
विभिन्न जातियों एवं जनजातियों का बच्चा गौरवान्वित अपना है ॥
यह व्यवहार सुन्दर जीवन जीने का सार है,,
यही जीवन व्यतीत करने का आधार है ॥
