2. Continuous Internal Assessment

2.1 Course Creation and CO/PO Mapping

2.1.1 Course Creation

- All the courses that are a part of the curriculum are created as per their baskets mentioned in the scheme. The system facilitates the use of the same courses for the next batch if the same course is being taught.
- If any new course is being introduced then it can be added through the tab “University Add Courses” in Settings at the ERP Coordinator level.

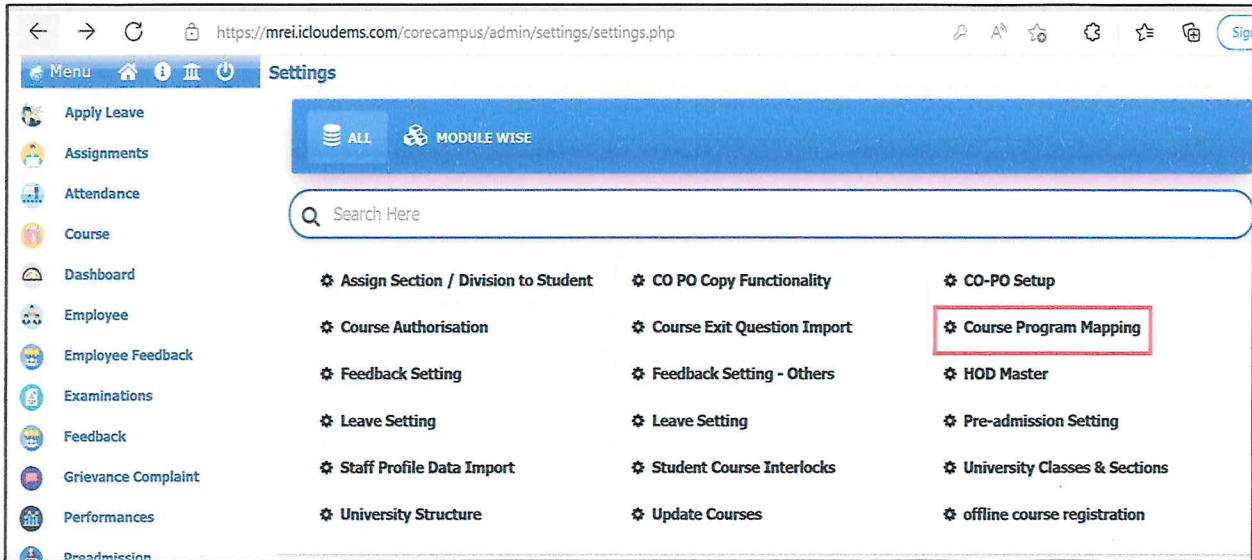

Update Courses

2.1.2 Course Program Mapping

- From the list of the courses, the courses as per the study scheme offered in upcoming semester and class are mapped through ‘Course Program Mapping’ window.
- All the courses i.e. core (both lectures and tutorials), electives, practical etc are mapped to the semester.
- Course list is present on the left side under “Course Pool” from where required courses are moved to the right side under the “Already Mapped Courses” list.

2.2 Assignment uploading & Marks

Students have been given assignments through ERP. Faculty upload the assignments corresponding to their courses. The assigned date and submission date is being set by the faculty and students are expected to submit the assignment by the due date. After the due date, ERP will not accept the submission. Faculty can also check anytime how many students have submitted the assignment and how many are yet to.

Marking of Assignment

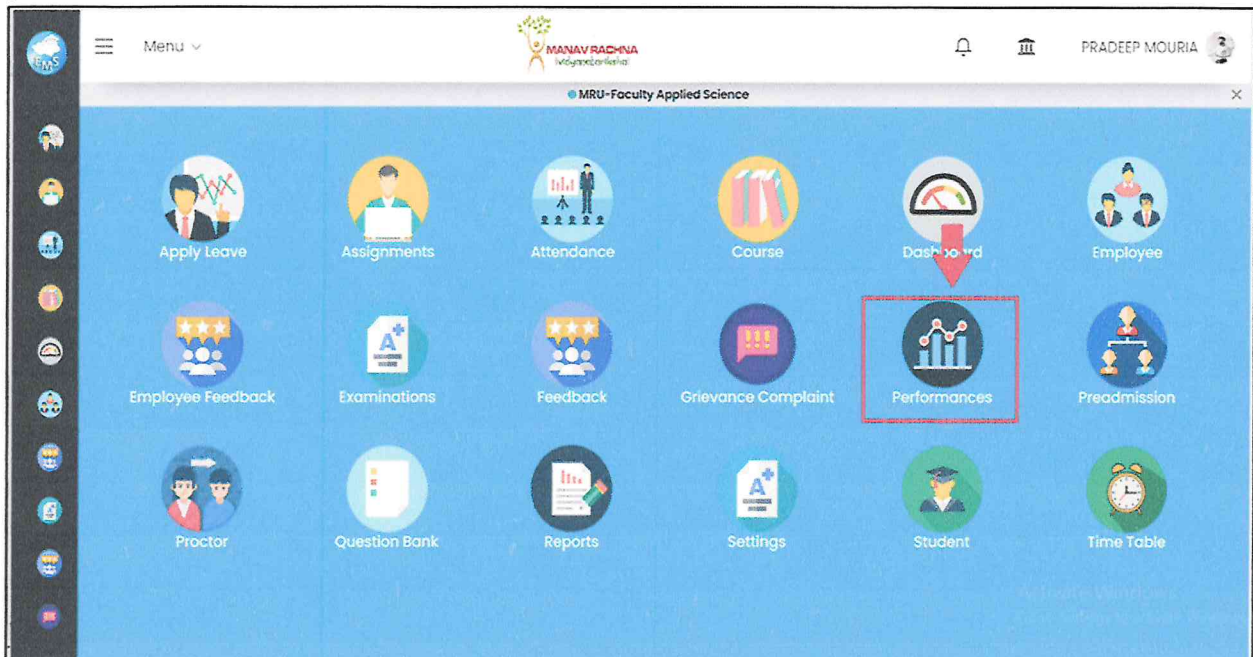

2.3 Continuous internal assessment through Rubrics

Each theory and practical course has internal as well as external assessment covering the following parameters with the CO mapping by uploading the excel sheet on ERP :

- Teacher's assessment: This includes assignments, tutorials, quiz, viva voce and lab report for practical courses etc.
- Sessional Test-1 and 2.
- End semester examination
- Technical Seminars, Colloquium and Projects
- Industrial Training: Assessment of training primarily includes feedback from the industry mentor and in-house faculty mentor. Presentations shall also be organized to assess the performance.
- Course Rubrics: These course specific evaluation charts have been prepared by course coordinators to assess student's performance consistently for CO and subsequent PO attainment analysis for lab courses, projects, colloquium, industrial training, etc. The scores (1, 2, 3, 4) would be awarded on the basis of their 'unsatisfactory', 'developing', 'satisfactory', and 'exemplary' performance in respective attributes. For students having scores less than or equal to 2, a subsequent action shall be initiated by the respective course instructor.

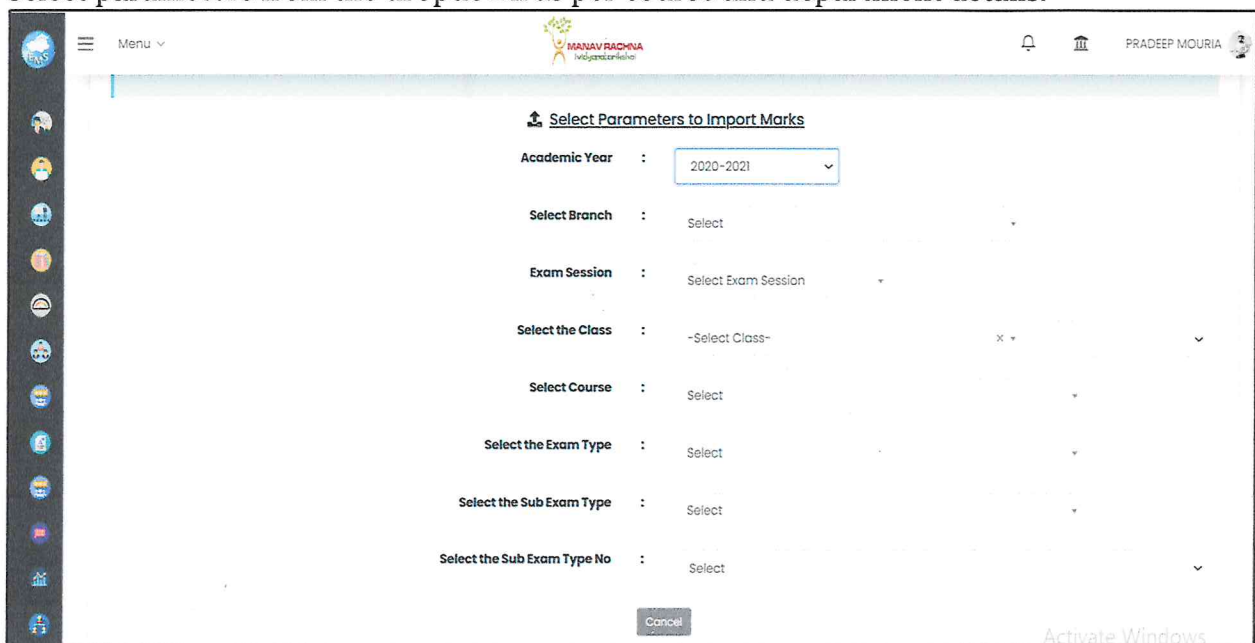

Performance window is for adding the marks and for applying the marks measuring parameters

4. Result Processing and Result Declaration

4.1. Result Processing

Result Processing includes uploading of marks of continuous assessment, generation of examination reports and grade cards.

4.1.1 Continuous Internal Assessment - Marks Uploading

- The faculty members teaching the course have to fill in the marks for all the internal assessment parameters.
- There are different parameters depending upon the nature of course i.e., practical courses have different parameters than theory courses.
- The provision of entering marks is provided in PERFORMANCE. This is available in the main window itself.
- The parameter can be selected from the scheduled sub-exam list and then clicking on “Proceed to Add marks”.
