Q4(B)	According to the Indian Contract Act 1872, a contract is nothing but an agreement which is enforceable by law. There are several types of contracts among which one is contract of indemnity. A contract of indemnity is a special type of contract. The term 'indemnity' means defense against any damage or a compensation. "A contract of indemnity is one in which one party promises another party to save him from loss	20	CO4	BT4	

caused to him by the promisor himself, or by the conduct of any other person." This has been defined under article 124 of the ICA, 1872.

However, in the English law it had a much wider meaning than this. Indemnity in English law means a promise to protect the other party harmless from the repercussions of an act. Thus, the English law is wide enough to include any type of actions such as fire or flood, but the Indian act allows protection against only human made losses.

In reference to given legal position, critically analyze the following with relevant case law:

'Every contract of insurance is a contract of indemnity, except in the case of life and personal insurance.'
