

Academic Audits

The Academic Audit at our university comprises a comprehensive three-phase internal audit conducted by the internal academic auditors followed by the external audit. The academic audit review-1 was conducted in August 2023 to gauge the academic preparedness of the faculty members and the departments. The ERP registrations, course plans, course assessment plans, course materials, and pedagogical approaches to be adopted by faculty members were reviewed. The second academic audit review conducted in October 2023, post-mid-semester, focused on monitoring continuous assessments implemented against the faculty-submitted Course Assessment Plans (CAPs), Attendance analysis, Feedback analysis, Mid-Term marks analysis, Action taken reports and other relevant data required in the academic audit form. The third academic audit review, conducted in January 2024 after the semester's completion, involved a thorough examination of complete course files, end semester marks analysis, and assessments of slow and fast learner progress, including action taken reports and impact analysis.

An external audit was scheduled on February 3, 2024, with Prof. (Dr.) Sandeep Grover, Dean of Institutions, J.C. Bose University of Science & Technology, YMCA, Faridabad, serving as the external auditor. The audit encompassed review of the academic audit forms followed by comprehensive review of files related to course files, CO-PO attainment data, different pedagogies, internal evaluation, experiential learning, industrial visits, industrial training, program booklets, departmental meeting records, MOOC, assignments, video lectures and lab stock. Recommendations and observations from the external audit were communicated to departments for integration into future semesters, ensuring on-going improvement in academic processes and quality.

Internal Academic Audit Review-I, II & III
